

Experience the marvels of Aeromodelling & Robotics

An Ancient Chinese Proverb says "I hear and I forget, I see and I remember, I do and I understand. This applies to teaching somebody something which makes a student fully understand by involving them in hands on activities. This is what Aerobotics Edustudio offers to the budding students by engaging students in making aero & robotic models and encourage innovation.

Aerobotics Edustudio had successfully organized aeromodelling & robotics workshop at various schools in Hyderabad. The workshop emphasizes students to have practical application of physics concepts, understand various material properties and further innovate and explore on various concepts.

Testimonials

I congratulate Aerobotics Team for coming up with this innovative concept of promoting science by conducting various workshops for school children. I wish you to add more hobby workshops in your pool. I wish you a great success.

Ramakrishna Reddy
Director
Alpha Model School

I enjoyed the workshop a lot. I made my two aeromodels using balsa wood and other material. They flew successfully.

Anurag Sharma
Student, Class IV
Gowtham Model School, Hyd

This is a unique and new concept. This kind of workshops will help students to develop their thinking ability and creativity. I was extremely happy to look at my children once they made their aeromodels.
